About City Patti

The word Patti is a changed version of the words, 'Patt', 'Patti' and 'Patte'. The word 'Patt' means town, 'Patti' refers to a specific area and the meaning of 'Patte' is an approved piece of writing. In earlier times, these towns or areas were given on lease by the authorities. Therefore, this region eventually became renowned as 'Patti'. Patti has its own distinct history and glory. In Hieun Tsang's voyage to India, as well, Patti finds mention. Hieun Tsang came to India in 629A.D. This was the reign of Harsh vardhan. It is thus evident that 'Patti' had an established reputation since ancient times. 'Patti' is also famous for the myth of King Duni Chand. It is believed that King Duni Chand in an angry outburst ordered his daughter Bibi Rajni to marry a cripple, a deformed young man. 'Patti' also has an educational institute in Bibi Rajni's name. 'Patti' occupied a prestigious position during the reign of the Mughals too. It has a huge castle. This castle had a stud farm for the superior breed of horses. The castle was initially used as a stable for horses and was maintained by horse riders. It served as a means for administrative control for the Authority. 'Patti' was under the reign of Sardar Khushal Singh when the Sikh military regime existed. He was the nephew of Nawab Kapur Singh. Kapur Singh didn't have his own child. So he made his nephew his successor. Maharaja Ranjit Singh had acquired the possession of 'Patti' from Khushal Singh. 'Patti' was considered the hub (centre) of Majha area. 'Majha' is further the core area in Punjab. It is not only a central area but also the most significant area. Before Partition 'Majha' comprised Lahore in Punjab and the area around Tarn Taran and Amritsar. The 'Tehsil' 'Patti' and Kasoor (the first 'Tehsil' of Pakistani Punjab) was the actual area under 'Majha'. The area was extremely fertile. The land in 'Majha' was known for its fertility. It was renowned for its prosperity. And hence, it had a thick population. During the reign of Maharaja Ranjit Singh, 'Patti' was known as the 'Nau Lakhi Patti' or the 'nine lac Patti' to symbolize its fertility. The maximum tax 9 lac, used to be collected from Patti in Punjab and for that reason the 'Lahorias' or 'Majhails' were greatly renowned. Lahore was also the capital city of Punjab throughout the reign of concerned government/ authorities. Since 'Patti' was located near Lahore, it acquired a significance of its own. 'Patti' thus has its own historical glory. During partition, Majha region also got divided. Due to Indo-Pak wars cities & towns located near newly built border gradually lagged behind in the race of development and became insignificant and Patti is one such town.

About College

With the changing time, the efforts started in the direction of providing higher education to the residents of this region. Consequently, a Government college was started at Patti in 1969. Initially the classes were held in the Government Senior Secondary School, Patti. The construction of building of the college was completed by 1973 and the first batch started in 1973-74. This college is situated on the Patti-Sarhali road. The total area of the college is 28 acres. Out of this, 8 acres has been given to the stadium of the Sports College. The college has an 'H' shaped double storey building. College has a well furnished administrative block, well stacked library with rich collection of books. There is a hostel also along with the college. The motive behind establishing this college was to provide higher education to the students of rural, backward and border region. It provided benefit to the area tremendously in terms of education but it failed to fulfill the needs of changing scenario due to lack of new professional and vocational courses and deficiency of staff. Due to these reasons, students from this region had to move to other cities to acquire higher education. The students and people of this region demanded to upgrade this college as per the needs of the time. This college has come under the management/administration of the University from the session 2012-13 as one of its constituent college. Guru Nanak Dev University has named it Guru Nanak Dev University College, Patti. Under the administration of GNDU, College is achieving its goals & providing quality education to this area.

It is a matter of honor and immense pleasure that destiny has given me an opportunity to lead the Constituent colleges associated with Guru Nanak Dev University, Amritsar. These colleges have been established as a result of united effort of UGC, Government of Punjab and Guru Nanak Dev University, Amritsar with special purpose of raising the standard of higher education especially in rural area. Higher education scenario globally has witnessed a significant change in approach and a remarkable growth. Higher education in India too, has readily adapted to the global demands and every institution has geared up to meet the global challenges by harnessing the latest technologies in education front. The major focus is on creating an optimized and vibrant platform for quality in knowledge enhancement and bridging the gap between academia and industry with an objective to build up core competence in students integrating knowledge with skills on the foundation of ethics and values. These colleges provide quality and affordable education to needy students.

While cherishing the journey and milestones achieved so far, we must look forward and prepare ourselves for future challenges to propel these colleges to even greater heights. The primary focus is to follow the New Education Policy (NEP) in its true spirit, fostering inter-disciplinary research, deepening industry-academia collaboration, exploring and developing new avenues of knowledge, and resource generation through knowledge transfer. The students spend a significant portion of their lives on campus. They join the college to make their dreams reality. In a world where change is the only constant; the colleges provide the students a solid foundation for their careers. The colleges give them the opportunity to integrate their mind, imagination, and emotions in order to become capable of resolving public issues. The students have twofold responsibilities: one is to transform themselves, and the other is to address the complex problems faced by the society. It is my earnest appeal to students to make the best use of the time they spend at the college for their holistic transformation. The students must keep their curiosity alive and experiment new things. Let us educate society and make it capable to generate innumerable ideas for human welfare. I am hopeful and confident that with the support and commitment of everyone, we will achieve new milestones with ever-rising benchmarks, help our youth in making their dreams a reality, and propel the colleges to new heights. I urge the students to choose these colleges as their first preference. The credit also goes to Vice-Chancellor of the University, who has put in great efforts to establish and develop these colleges.

Importance of Constituent Colleges

GNDU is running fourteen constituent colleges at Patti, Verka, Chungh, Mithra, Narot Jaimal Singh, Pathankot & Phillaur etc. The Constituent colleges have their own significance. They have minimal (lesser) fees as compared to private colleges. The administrative control lies under the University. The staff is appointed by the University. So, the college has well qualified, capable, dedicated & adequate staff. The aim and objective of these colleges is to provide quality education to students, especially the unprivileged lot. No compromises are being made by the University, as far the appointment of the staff is concerned. Well qualified, experienced and devoted/dedicated staff members are the heart and soul of an institution. Constituent colleges are known for the quality of class room teaching. And this is exactly what this college aims at. The University provides all that is necessary infrastructure including furniture, labs equipments and books. Everyone is able to assess the changes that are taking place in the college after the lapse of every year. The University is committed to bring changes both in the building, infrastructure as well as the working of the college. Separate funds have been kept aside for this purpose. The college seems to have been reborn. So provision has been made to teach job oriented, professional courses as per the needs of the modern era. It appears as if the long pending demand of the people has been catered to. Their need for intellectual growth seems to be satisfied. The students have now absolutely no need to go too far flung areas for studying professional courses.

350th SHAHEEDI DIVAS OF SHRI GURU TEGH BAHADUR JI

Guru Tegh Bahadur Ji was the ninth Guru of the Sikh religion. He was born on April 1, 1621. He was the son of Guru Har Gobind Sahib Ji. In his childhood, during a battle, he displayed great bravery, for which his father bestowed upon him the title of "Tegh Bahadur" (brave of the sword). After the passing of Guru Har Krishan Ji in 1664, he became the ninth Guru of the Sikh religion. The Guru taught people to follow the path of truth, patience, fearless life, and the name of the Almighty. His teachings are included in the Guru Granth Sahib, which instructs humanity to stay away from Maya (materialistic world) and to walk on the path of truth. At that time, the Mughal Emperor Aurangzeb was putting pressure on people to convert their religion by force. When the Pandits of Kashmir came to the Guru for their protection, the Guru decided to sacrifice himself for the sake of religion. Consequently, the Guru was arrested and martyred on November 24, 1675, at Chandni Chowk, Delhi. Due to this sacrifice, he is also called "Hind di Chadar" (Shield of India).

It was amazing to learn about the different stages of fish growth and the care taken to ensure their health. This experience has given us a deeper appreciation for the effort that goes into bringing seafood to our tables. Plus, it was super fun! and we also learn about integrated fish farming. Integrated fish farming is like a win-win approach! It's a system where fish farming is combined with other agricultural practices, like growing crops or raising livestock. This way, waste from one component becomes a resource for another. For example, fish pond water rich in nutrients can be used to irrigate crops, and livestock waste can be used as fish feed. It's eco-friendly, efficient, and boosts overall productivity!
